PROFESSIONAL SUMMARY

Full-stack developer with **2+ years** of experience building and maintaining enterprise ERP applications at a product-based company. Specialized in Java, Spring Boot, React.js, Node.js, and PostgreSQL, with a strong track record of delivering client-facing features, optimizing APIs, and improving workflow efficiency in finance and automation systems. Skilled in translating complex business requirements into reliable, scalable software.

EDUCATION

Maulana Azad National Institute of Technology

B.Tech in Civil Engineering

July 2019 – June 2023

Bhopal, India

- CGPA: 8.02

WORK EXPERIENCE

Software Development Engineer (SDE-2)

April 2024 – Present

Star Tech Software Pvt. Ltd.

Bhopal, India

Promoted: Junior Software Developer → SDE-2 (Oct 2025)

Products: Star Automation (React + Node.js + PostgreSQL) · Star Finance (Spring Boot + Hibernate)

- Led full-stack development of the Accounts Payable (AP) module for Star Automation — built Voucher Cash Disbursement, Payment File Generation, Remittance, and Multi-Level Approver Workflow, improving finance team productivity by 45–50%.
- Contributed to Star Finance ERP (Accounts Receivable, Cash Management, AP modules), improving workflow efficiency by 65–70% through feature development and process automation.
- Optimized backend REST APIs and PostgreSQL queries, achieving 35% faster response times and 30% reduction in database load for high-volume client transactions.
- Built and maintained React.js frontend and Node.js backend services integrated with PostgreSQL, ensuring high availability and smooth user experience across enterprise clients.
- Worked directly with enterprise clients for requirement gathering, issue resolution, and feature delivery — maintained a 100% on-time release record.
- Proposed and implemented query and architecture optimization strategies, improving API latency and scalability for multi-tenant deployments.
- Followed Agile development practices — participated in sprint planning, daily standups, and sprint reviews using Azure DevOps for task tracking and backlog management.

TECHNICAL SKILLS

Primary Stack: Java, Spring Boot, React.js, Node.js, JavaScript(ES6+), Python, SQL, HTML/CSS

Developer Tools: Git, GitHub, Docker, Postman, Azure DevOps, Linux/Unix, VS Code, IntelliJ, Eclipse

Domain Knowledge: DSA, OOPS, ERP Systems, AP/AR Modules, Payment file Banking Systems, Agile/Scrum

Familiar With: Microservices, Operating System, Low level design, Algorithms, SOLID Patterns, Design Patterns

PROJECTS

Spring Boot E-Commerce Web Application

[Github](#)

- Developed a monolithic E-Commerce platform with features like user management, product catalog, shopping cart, and order placement with stock checks.
- Implemented CRUD operations via JPA/Hibernate and optimized database performance with PostgreSQL.
- **Tech Stack:** Java Spring Boot, JPA, PostgreSQL, Docker, IntelliJ

CERTIFICATIONS

- NPTEL - Programming, Data Structures and Algorithms using Python.
- UDEMY - RESTful Java Web Services using JAX-RS and Jersey
